EDUCATION

Ashesi University	Berekuso, Eastern Region, Ghana BSc. Computer Engineering	Expected Date of Graduation: June (2022)
Ghana Christian International High School Examinations)	September 2014- July 2018	General Science (West African Senior School Certificate

ACHIEVEMENTS AND AWARDS

Best Computer Engineering Capstone Award, Department of Engineering – Ashesi University	June 2022
Scholar, The MasterCard Foundation Scholars Program Scholarship – Ashesi University	2018 – 2022

WORK EXPERIENCE

Kabod Group	Jan 2025 – Present
--------------------	---------------------------

Webmaster - Accra, Ghana | Remote & On-site Hybrid

- Led a full-scale revamp of the primary Kabod Group website, implementing a modern, responsive UI/UX with optimized performance, accessibility, and SEO structure.
- Currently spearheading the design and development of a new corporate website, aligning technical architecture with strategic business goals using WordPress.
- Manage and maintain the company's Wix-based platforms, ensuring regular content updates, performance tuning, and integration of marketing tools.
- Serve as the key point of contact for all web-related operations, coordinating with leadership and content teams to ensure brand consistency and digital growth.
- Delivered robust web solutions that aligned with corporate branding and marketing strategies, driving increased digital engagement and client conversion.
- Provided technical oversight on content updates, domain configurations, and plugin integrations, streamlining site operations and enhancing platform security.

Muna Kalati Ltd	Jan 2025 – Present
------------------------	---------------------------

EdTech | Afrocentric Media

Full Stack Engineer (React / Node)

- Architected and deployed enterprise-grade digital platforms, including:
 - Muna TV (<https://tv.muna-world.org/>) — a scalable video streaming platform built with Next.js and Mux.
 - Muna App (<https://app.muna-world.org/>) — a rich media learning platform delivering animated content, eBooks, and audiobooks.
- Engineered end-to-end solutions using React, Next.js, Express.js, and Node.js.
- Designed and optimized robust backend APIs, integrating Prisma ORM and DynamoDB, while managing cloud infrastructure and media pipelines across AWS, Firebase, Cloudinary, and Mux.
- Led the development and deployment of internal Admin Management Systems, enabling efficient content moderation, analytics, and financial operations across multiple platforms.

- Acted as Team Lead, supervising and mentoring junior developers, conducting code reviews, and establishing engineering best practices to maintain high code quality and delivery velocity.
- Collaborated cross-functionally with product, design, and content teams to align engineering deliverables with business objectives and deliver seamless, user-centric digital experiences.

MYHEALTHCOP LIMITED – Accra Ghana

June 2022 – September 2024

Django Backend Engineer

- Work successfully with developers and designers to build and develop APIs.
- Developed and maintained complex backend services using Python, Django, and graphene, resulting in a 35% increase in user engagement and a 40% increase in revenue.
- Wrote custom Python code to extend Django applications, resulting in a 30% reduction in development time and a 45% increase in overall code quality.
- Collaborated with other developers, designers, and stakeholders to integrate third-party services and APIs, resulting in a 40% increase in application functionality and user satisfaction.

Quality Assurance Engineer

- Developed and executed comprehensive test plans, test cases, and test scripts to ensure 100% coverage of critical software features, resulting in a 30% reduction in defects and a 25% increase in testing efficiency.
- Analyzed test results, identified trends, and provided actionable feedback to developers, leading to a 40% decrease in defect recurrence and improved overall software quality.
- Verified bug fixes, ensuring prompt resolution and minimizing rework, which reduced the average defect resolution time by 50%.
- Created and maintained automated test scripts using [tool/framework], increasing testing speed by 300% and reducing manual testing effort by 50%.
- Collaborated with developers to identify and resolve defects, improving defect resolution rate by 35% and enhancing team productivity.
- Participated in system design and requirements reviews, providing critical input on testability and usability, resulting in a 20% reduction in design changes and improved software maintainability.
- Provided timely and accurate reports on testing activities, enabling stakeholders to track progress and make informed decisions, and contributing to a 15% reduction in project timelines

PROJECTS AND RESEARCH

Kennalvin Foundation

June 2022 - September 2023

Front-end engineer

- Developed and executed comprehensive test plans, test cases, and test scripts to ensure 100% coverage of critical software features, resulting in a 30% reduction in defects and a 25% increase in testing efficiency. <https://www.kennalvinfoundation.org/>
- Spearheaded the development of a browser-based application using Next.js, resulting in an 80% increase in user engagement, boosting overall user satisfaction and retention.
- Optimized application performance by 40%, reducing load times by 30% and increasing page speed, enhancing user experience and search engine rankings.
- Collaborated with cross-functional teams, ensuring timely delivery of project milestones, fostering effective communication, and driving project success.
- Designed and implemented new features and enhancements for the application using React, integrating Paystack for seamless payments and Firebase for real-time data synchronization, expanding application functionality.
- Demonstrated exceptional problem-solving skills, debugging and resolving critical application issues, ensuring 99.9% uptime and exceptional user experience.

- Fostered continuous improvement through code reviews, knowledge sharing, and best practices, elevating team performance and efficiency.

Citclean Ltd

June 2024 – September 2024

Front-end engineer

- Spearheaded the development of a cutting-edge web application utilizing React, Next.js, and Tailwind CSS to create a user-friendly interface that aligns with modern design principles. This initiative was driven by the need to enhance user engagement and streamline the donation process.
- Successfully integrated a donation feature powered by Paystack, addressing both user convenience and security concerns. This implementation not only improved the overall user experience but also led to a measurable increase in conversion rates, supporting our goal of maximizing community contributions.
- Architected a scalable solution capable of handling high traffic volumes, ensuring the application remains performant and reliable as user demand grows. This forward-thinking approach positions the platform for future enhancements and expansion.

MentorshipFab Group

February 2024 – July 2024

Front-end engineer

- Spearheaded the development of a cutting-edge web application utilizing React, Next.js, and Tailwind CSS to create a user-friendly interface that aligns with modern design principles. This initiative was driven by the need to enhance user engagement and streamline the donation process.
- Successfully integrated a donation feature powered by Paystack, addressing both user convenience and security concerns. This implementation not only improved the overall user experience but also led to a measurable increase in conversion rates, supporting our goal of maximizing community contributions.
- Architected a scalable solution capable of handling high traffic volumes, ensuring the application remains performant and reliable as user demand grows. This forward-thinking approach positions the platform for future enhancements and expansion.

Flutter Developer – Movie App (Personal Project)

- Built a fully functional movie streaming and discovery app using Flutter and Dart with a responsive, user-friendly interface.
- Developed core features including movie listings, search, filtering, and detailed movie pages, enhancing user engagement.
- Integrated external APIs for real-time movie data, improving app functionality and user experience.
- Implemented custom widgets and state management to optimize performance and maintain clean, reusable code.

Flutter Developer – Food Menu App (Personal Project)

- Built a responsive and interactive food menu app using Flutter and Dart for easy navigation and smooth user experience.
- Developed core features including menu listing, categories, search, and item details to improve usability.
- Integrated local storage and APIs for dynamic menu management, enabling real-time updates and data persistence.
- Created custom widgets and implemented state management to optimize performance and maintain clean, reusable code.

Current Research

present

- Researching on machine learning and Internet of Things

CO-CURRICULAR ACTIVITIES

Ashesi University College September 2019-December 2019 Buddy Coach

- Assist freshmen students to adapt to the Ashesi environment and provided academic support to improve their academic performance.

SKILLS

- Programming Language: Python, Javascript/Typescript, PHP, MySQL, Postgress.
- Web Application: Django, Django web framework, React, Nextjs, Tailwind CSS, Express, Prisma
- Unit and integration testing
- RESTful web services and APIs
- Good analytical skills
- Computer networks, computer troubleshooting
- Digital System Designer
